1	Linear Multivariable Systems	4
1.1	Nomenclature	4
1.2	SISO	4
1.3	MIMO	4
1.4	Linear Time-Invariant (LTI)	4
1.5	State Space	5
1.6	Controllability	6
1.7	Observability	7
1.8	Stabilizability	8
1.9	Detectability	8
1.10	Operations	9
1.11	Polynomial and Rational Matrices	10
1.12	Poles and Zeros	15
1.13	Minimal Realizations	17
2	H_2 and H_∞ Spaces	18
2.1	Complex-valued Functions	18
2.2	Linear Vector Spaces	19
2.3	$L_\infty[a, b]$ Space	20
2.4	$L_\infty(j\mathbb{R})$ Space	21
2.5	H_∞ Space	22
2.6	Pre-Hilbert and Hilbert Spaces	23
2.7	$L_2[a, b]$ Space	24
2.8	$L_2(j\mathbb{R})$ Space	25
2.9	H_2 Space	26
2.10	$H_2^\perp$ Space	27
2.11	Relations between H_2 , $H_2^\perp$ and $L_2(j\mathbb{R})$ spaces	28
2.12	Linear Operators	30
2.13	H_∞ norm as an operator norm	31
2.14	Inner Functions	32
3	Computing RH_2 and RH_∞ Norms	34
3.1	Sylvester and Lyapunov Equations	34
3.2	Computing the RH_2 norm	37
3.3	Computing the RL_2 and $RH_2^\perp$ norms	38

3.4	Computing the RL_∞ norm	39
3.5	Algebraic Riccati Equations	42
4	Stability	47
4.1	Well-posedness	47
4.2	Internal Stability	48
4.3	Coprime Factorization over RH_∞	54
4.4	All Stabilizing Controllers	60
4.5	Matlab demo	71
4.6	Linear Fractional Transformation	88
5	The H_∞ Optimal Control Problem	90
5.1	Problem Statement	90
5.2	Equivalent Formulation as a Hankel Approximation Problem . . .	91
5.2.1	The 1-Block Problem	93
5.3	Equivalent Formulation as a Model Matching Problem	94
5.4	Super Simplified H_∞ Control Problem Solution	95
5.5	Removing the Assumptions	97
5.5.1	$D_{yu} = 0$	97
5.5.2	Normality of D_{zu} and D_{yw}	97
5.5.3	Orthogonality of C_z and D_{zu}	98
5.5.4	Orthogonality of B_w and D_{yw}	99
5.5.5	$D_{zw} = 0$ can be relaxed, but it is not so simple!	99
5.6	Not So Simplified H_∞ Control Problem Solution	100
5.7	A Proof Using Linear Matrix Inequalities	102
5.7.1	Preliminaries	102
5.7.2	Equivalence with Static Output Feedback	106
6	Applications of H_∞ Control	121
6.1	A Simple Frequency Domain Design	121
6.2	Example #1	122
6.3	Example #2	129
6.4	Example #3	134
6.5	Robust Analysis	140
6.5.1	Unstructured Additive Uncertainty	142
6.5.2	Unstructured Multiplicative Uncertainty	143
6.5.3	Unstructured Fractional Uncertainty	144

6.5.4	Structured Uncertainty	146
6.5.5	μ Analysis	146
6.6	Example #4 [Parametric Uncertainty]	148
6.7	Example #5 [Parametric Uncertainty]	150
6.8	Example #6 [Parametric Uncertainty]	153
